Subject index

N-acyl-N′,N′-dimethylhydrazines
Electrochemical generation of reactive nitrogen species. Part 14. Anodic oxidation of N-acyl-N′,N′-dimethylhydrazines (Fuchigami et al.) 141
Adsorption voltammetry
Adsorption voltammetry of selenium in the presence of phenylenediamine (*o*-PDA) (Jiangyan Wang et al.) 59
Determination of trace chromium(III) by linear sweep adsorption voltammetry (Jianmin Lu et al.) 49
Determination of ultra-trace vanadium by 1.5th and 2.5th order derivative adsorption voltammetry (Wenrui Jin et al.) 41
Amines
Chemical modification of platinum and gold electrodes by naphthoquinones using amines containing sulphhydryl or disulphide groups (Katz, Solov'ev) 171
Amino compounds
A chemically modified electrode capable of a spontaneous immobilization of amino compounds due to its functionalization with succinimidyl groups (Katz) 257
Anion effect
The anion effect on the condensation of thiourea at the mercury/ethanolic solution interface (Skompska, Jaszczynski) 217
Anion/surface interactions
Strong anion/surface interactions: perchlorate reduction on a Rh(100) electrode studied by voltammetry (Rhee et al.) 281

Carbon monoxide
Study by UV–visible potential-modulated reflectance spectroscopy of the chemisorption of CO, MeOH and EtOH on several noble metal electrodes (Caram, Gutierrez) 289
Catalytic processes
Theory of analytical spectroelectrochemistry. Catalytic process (Xie, Dong) 1
Chromium
Determination of trace chromium(III) by linear sweep adsorption voltammetry (Jianmin Lu et al.) 49
Chronoamperometry
Chronoamperometric evidence for fractality in porous TiO_2 films (Wu et al.) 235
Cobalt
Electrocatalytic oxidation of H_2O_2 at a cobalt protoporphyrin modified electrode and its application in analysis (Jiang, Dong) 11
Response properties of an ion-selective polymeric membrane phosphate electrode prepared with cobalt phthalocyanine and characterization of the electrode process (Liu et al.) 67
Condensation
Analysis of a generalised spin-1/2 Ising model for two-dimensional condensation (Basha, Sangaranarayanan) 261
The anion effect on the condensation of thiourea at the mercury/ethanolic solution interface (Skompska, Jaszczynski) 217
Copper
Electrochemical examination of the copper oxidation state in the fluorine doped Nd_2CuO_4 superconductor (Rosamilia, Miller) 163

Dibenz[b,e]-thiepinone
Cyclic voltammetry and spectral study of the electrochemical reduction of some dibenz [b,e]-thiepinone derivatives (Ciureanu et al.) 201
Diffusion
The steady-state current for a microelectrode near diffusion limited conditions (Phillips) 251
Disulphide groups
Chemical modification of platinum and gold electrodes by naphthoquinones using amines containing sulphhydryl or disulphide groups (Katz, Solov'ev) 171

Doping
Ion and solvent transfer accompanying polybithiophene doping and undoping (Hillman et al.) 147

Ethanol
Study by UV–visible potential-modulated reflectance spectroscopy of the chemisorption of CO, MeOH and EtOH on several noble metal electrodes (Caram, Gutierrez) 289

Europium
Electrochemistry of Yb^{3+} and Eu^{3+} at Nafion modified electrodes (Ugo et al.) 187

Ferri/ferrocyanide
Redox reactions of $Fe(CN)_6^{3-/4-}$ in polypyrrole films. Accumulation and removal of cations (Dong, Lian) 23

Fluorine
Electrochemical examination of the copper oxidation state in the fluorine doped Nd_2CuO_4 superconductor (Rosamilia, Miller) 163

Formic acid
Electro-oxidation of formic acid at iridium electrodes. Role of deposited heavy metals (Zagal et al.) 123

Fractality
Chronoamperometric evidence for fractality in porous TiO_2 films (Wu et al.) 235

Gas-diffusion electrodes
Electroreduction of nitrogen to ammonia on gas-diffusion electrodes loaded with inorganic catalyst (Furuya, Yoshiba) 269

Gold
Chemical modification of platinum and gold electrodes by naphthoquinones using amines containing sulphhydryl or disulphide groups (Katz, Solov'ev) 171
ESR and electrochemical studies of self assembled oligoimide monolayers on gold (Kwan et al.) 295

Heavy metals
Electro-oxidation of formic acid at iridium electrodes. Role of deposited heavy metals (Zagal et al.) 123

Heterogeneous amalgam
On the formation and oxidation of a heterogeneous amalgam of iron (Winkler et al.) 103

Hydrogen
Poly(pyrrole-2,2′-bipyridyl Rh(III) complexes) modified electrodes: molecular materials for hydrogen evolution and electrocatalytic hydrogenation (De Oliveira et al.) 243

Hydrogen peroxide
Electrocatalytic oxidation of H_2O_2 at a cobalt protoporphyrin modified electrode and its application in analysis (Jiang, Dong) 11

Ion-selective electrodes
Response properties of an ion-selective polymeric membrane phosphate electrode prepared with cobalt phthalocyanine and characterization of the electrode process (Liu et al.) 67

Iridium
Electro-oxidation of formic acid at iridium electrodes. Role of deposited heavy metals (Zagal et al.) 123

Iron
On the formation and oxidation of a heterogeneous amalgam of iron (Winkler et al.) 103

Methanol
Study by UV–visible potential-modulated reflectance spectroscopy of the chemisorption of CO, MeOH and EtOH on several noble metal electrodes (Caram, Gutierrez) 289

Microelectrodes
The steady-state current for a microelectrode near diffusion limited conditions (Phillips) 251

Microscopic reaction rates
The use of time-resolved scanning tunneling microscopy for the determination of microscopic reaction rates (Zhang, Stimming) 273

Nafion
Electrochemistry of Yb^{3+} and Eu^{3+} at Nafion modified electrodes (Ugo et al.) 187

Naphthoquinones
Chemical modification of platinum and gold electrodes by naphthoquinones using amines containing sulphhydryl or disulphide groups (Katz, Solov'ev) 171

Neodynium
Electrochemical examination of the copper oxidation state in the fluorine doped Nd_2CuO_4 superconductor (Rosamilia, Miller) 163

Nitrogen
Electrochemical generation of reactive nitrogen species. Part 14. Anodic oxidation of N-acyl-N′,N′-dimethylhydrazines (Fuchigami et al.) 141
Electroreduction of nitrogen to ammonia on gas-diffusion electrodes loaded with inorganic catalyst (Furuya, Yoshiba) 269

Oligoimide monolayers
ESR and electrochemical studies of self assembled oligoimide monolayers on gold (Kwan et al.) 295

Perchlorate
Strong anion/surface interactions: perchlorate reduction on a Rh(100) electrode studied by voltammetry (Rhee et al.) 281
Phenylenediamine
Adsorption voltammetry of selenium in the presence of phenylenediamine (*o*-PDA) (Jiangyan Wang et al.) 59
Phthalocyanines
Response properties of an ion-selective polymeric membrane phosphate electrode prepared with cobalt phthalocyanine and characterization of the electrode process (Liu et al.) 67
Platinum
Chemical modification of platinum and gold electrodes by naphthoquinones using amines containing sulphhydryl or disulphide groups (Katz, Solov'ev) 171
Polybithiophene
Ion and solvent transfer accompanying polybithiophene doping and undoping (Hillman et al.) 147
Polymeric membrane phosphate
Response properties of an ion-selective polymeric membrane phosphate electrode prepared with cobalt phthalocyanine and characterization of the electrode process (Liu et al.) 67
Polymer films
Electrochemical properties of poly-*ortho*-aminophenol modified electrodes in aqueous acid solutions (Barbero et al.) 81
Poly-*ortho*-aminophenol
Electrochemical properties of poly-*ortho*-aminophenol modified electrodes in aqueous acid solutions (Barbero et al.) 81
Polypyrrole
Redox reactions of $Fe(CN)_6^{3-/4-}$ in polypyrrole films. Accumulation and removal of cations (Dong, Lian) 23
Poly(pyrrole-2,2′-bipyridyl Rh(III) complexes
Poly(pyrrole-2,2′-bipyridyl Rh(III) complexes) modified electrodes: molecular materials for hydrogen evolution and electrocatalytic hydrogenation (De Oliveira et al.) 243
Porphyrins
Electrocatalytic oxidation of H_2O_2 at a cobalt protoporphyrin modified electrode and its application in analysis (Jiang, Dong) 11
Potential-modulated reflectance spectroscopy
Study by UV–visible potential-modulated reflectance spectroscopy of the chemisorption of CO, MeOH and EtOH on several noble metal electrodes (Caram, Gutierrez) 289

Quartz crystal microbalance
Ion and solvent transfer accompanying polybithiophene doping and undoping (Hillman et al.) 147

Radiotracer technique
The detection limit of the in-situ radiotracer technique for the adsorption at the solid–solution interface (Gamboa-Aldeco, Szklarczyk) 227
Rhodium
Poly(pyrrole-2,2′-bipyridyl Rh(III) complexes) modified electrodes: molecular materials for hydrogen evolution and electrocatalytic hydrogenation (De Oliveira et al.) 243
Strong anion/surface interactions: perchlorate reduction on a Rh(100) electrode studied by voltammetry (Rhee et al.) 281

Scanning tunneling microscopy
The use of time-resolved scanning tunneling microscopy for the determination of microscopic reaction rates (Zhang, Stimming) 273
Selenium
Adsorption voltammetry of selenium in the presence of phenylenediamine (*o*-PDA) (Jiangyan Wang et al.) 59
Solid–solution interface
The detection limit of the in-situ radiotracer technique for the adsorption at the solid–solution interface (Gamboa-Aldeco, Szklarczyk) 227
Spectroelectrochemistry
Theory of analytical spectroelectrochemistry. Catalytic process (Xie, Dong) 1

Spin-1/2 Ising model
Analysis of a generalised spin-1/2 Ising model for two-dimensional condensation (Basha, Sangaranarayanan) 261
Succinimidyl
A chemically modified electrode capable of a spontaneous immobilization of amino compounds due to its functionalization with succinimidyl groups (Katz) 257
Sulphhydryl groups
Chemical modification of platinum and gold electrodes by naphthoquinones using amines containing sulphhydryl or disulphide groups (Katz, Solov'ev) 171
Superconductors
Electrochemical examination of the copper oxidation state in the fluorine doped Nd_2CuO_4 superconductor (Rosamilia, Miller) 163

Thiourea
The anion effect on the condensation of thiourea at the mercury/ethanolic solution interface (Skompska, Jaszczynski) 217
Time-resolved scanning tunneling microscopy
The use of time-resolved scanning tunneling microscopy for the determination of microscopic reaction rates (Zhang, Stimming) 273
Titanium dioxide
Chronoamperometric evidence for fractality in porous TiO_2 films (Wu et al.) 235
Trace determination
Determination of trace chromium(III) by linear sweep adsorption voltammetry (Jianmin Lu et al.) 49
Determination of ultra-trace vanadium by 1.5th and 2.5th order derivative adsorption voltammetry (Wenrui Jin et al.) 41

Vanadium
Determination of ultra-trace vanadium by 1.5th and 2.5th order derivative adsorption voltammetry (Wenrui Jin et al.) 41

Ytterbium
Electrochemistry of Yb^{3+} and Eu^{3+} at Nafion modified electrodes (Ugo et al.) 187
